

AGRICULTURE

Solutions for Increased
Productivity & Output

ROSTA
OUR GOAL

ROSTA solutions are **simple, smart and durable**, providing you with increased **efficiency and productivity**. Our products offer you many advantages: **a lower total cost of ownership** of your machinery, **custom engineering** services, **digital monitoring** services and **sensorics** for Industry 4.0 applications. Combined with **best-in-class after-sales** service and a global reach, this ensures your added value. **At ROSTA, your success is our goal.**

ROSTA COMPANY PROFILE

OUR PRODUCTS & SOLUTIONS

Conveying, Tensioning, Guiding, Pressing,
Sifting & Damping

AGRICULTURAL SOLUTIONS

CROP CLEANING & CONVEYING SOLUTIONS

Guiding

Gyratory grain cleaning equipment requires constant maintenance of bearings and belt drives.

Maintenance free ROSTA products eliminate costly downtime and replacement parts.

- High load capacity
- Large stroke
- Quiet operation

ROSTA AV ® Type
Oscillating Mounting

Sifter designed with ROSTA AV ® mounts

Grain Cleaning Equipment designed with ROSTA AV ® mounts

Conveying

Linear conveying is used in the cleaning and conveying of grains, barley and corn crops

ROSTA oscillating mounts are an efficient solution for crop sorting and conveying equipment by providing long life and a controlled operation.

- True linear motion
- Vibration damping
- Controlled start/shutdown

ROSTA AB - ABI ® Types
Oscillating Mountings

Crop Sorting & Conveying designed with ROSTA AB ®

Crop Sorting & Conveying designed with ROSTA AB ®

AGRICULTURAL SOLUTIONS

TILLAGE & FIELD PREPARATION

Pressing

Agriculture includes the cultivation and tillage of the soil in preparation for crops.

Maintenance free ROSTA products eliminate costly downtime and replacement parts.

- High load capacity
- Large stroke
- Quiet operation

ROSTA DR ® Type
Rubber Suspension Unit

Tillage suspension designed with
ROSTA DR ®

Tillage suspension designed with
ROSTA DR ®

Dampening

Precision in the agriculture industry is necessary to the equal distribution of seeds and fertilizer alike.

ROSTA solutions provide this precision of modern spreading technology with long life and controlled operation of equipment..

- Distributes evenly
- Long-life
- Progressive Dampening

ROSTA DR ® Type
Rubber Suspension Unit

Air seeder suspension designed designed with
ROSTA DR ®

Manure distributor designed with
ROSTA DR ®

AGRICULTURAL SOLUTIONS

DAMPENING AND TENSIONING EQUIPMENT

Dampening

The modern harvester or combine, is a versatile machine designed to efficiently harvest a variety of grain crops.

ROSTA DR solutions provide dampening that protect equipment and lengthen its service life.

- One part solution
- Maintains constant tension
- Absorption of shock loads

ROSTA DR ® Type
Rubber Suspension Unit

Harvester designed with ROSTA DR ®

Combine designed with ROSTA DR ®

Tensioning

A baler or hay baler is a piece of farm machinery used to compress a cut and raked crop into compact bales that are easy to handle, transport and store.

ROSTA tensioners provide optimum tension for chain and belt drives. They are being used effectively to improve design and function of many equipment designs by providing:

- Constant tension force
- Minimal setting and high damping
- Long-lasting

ROSTA SE ® Type
Tensioner Range

Baler designed with ROSTA SE ®

Row Crop Gatherer designed
with ROSTA SE ®

AGRICULTURAL SOLUTIONS

RUBBER AND CUSTOM DESIGN SOLUTIONS

Pressing

Farming and farm machinery have continued to evolve. Today's machinery is designed to cultivate many more acres of land at a higher rate of speed.

ROSTA rubber and custom design solutions assist manufacturers in staying at the forefront of a competitive industry.

- Custom sizes for ideal performance
- Improves acres per hour
- Continual ground pressure
- Long life

ROSTA Rubber Cords ®

High speed tillage designed with ROSTA Custom Rubber Inserts

Guiding

During harvesting, every component must work together to provide reliable performance.

The ROSTA custom rocker provides controlled guided motion during a continuous process.

- Quick, easy installation
- Custom design
- High isolation degree
- Maintenance-free
- Long service life

ROSTA AS/AD ® Types
Custom Rocker Solution

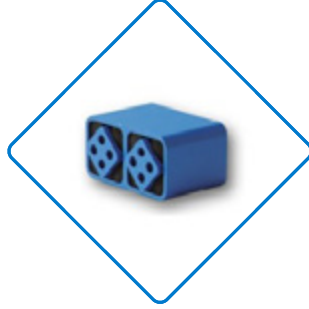

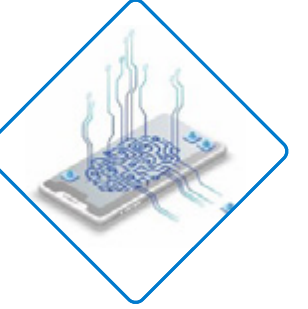

Cleaning shoe for combine designed with ROSTA AS ®

OVERVIEW

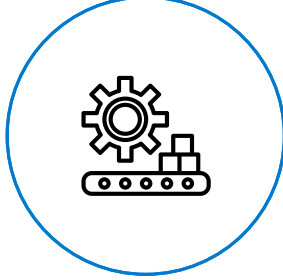

OUR PRODUCTS, SERVICES & PARTNERS

PRODUCT LINES

				
Rubber Suspension Units	Oscillating Mountings	Tensioner Devices	Motorbases	Digital Industry 4.0

APPLICATIONS

					
Conveying	Damping	Guiding	Pressing	Sifting	Tensioning

INDUSTRIES

						
Machinery Parts	Transports	Food	Goods	Mining	Industry	Others
